

BeeNectar Questionnaire 1

introducing beekeepers

Name and Surname of Beekeeper	Address	Contact Phone	E-mail	How long have you been keeping bees?	What are your most common locations for hives?	Beekeeping Altitude	How many LR hives do you have?	Describe the conditions of the environment where you keep bees.	What types of honey do you produce?	What other beekeeping products do you make?
Nenad Stojanović	Deli Jovana br.5 - Zaječar	019/435-421 064/19-57-860		13 years	The Zaječar District, in the area of the Lubnica Village (winter shelter)	260 m	60	Good (away from big polluters and major motorways, in the area with relatively poorly maintained crop and fruit plantations).	Acacia and linden honey	swarms and queen bees for own needs; propolis for the market
Borivoje Bocić	Varšavska 20 - Zaječar	019/730-257 061/60-74-319		42 years	Stationary apiary at the foot of the Stara Mountain	300 m	6	I keep hives in strictly ecological environment	Acacia and linden honey	Propolis, honey with pieces of honeycombs in it, wax
Radojko Gole	Veljka Vlahovića 2 - Priboj	033/453-656 064/21-08-641		15 years	Stationary apiary around the Uvac River	450 m	9	Good, without too much spraying the raspberry plantations with fungicides	Blended, floral, meadow and forest honey	Honey, pollen and propolis
Branislav Jakovljević	Lomina 18 - Gornji Milanovac	032/710-079 032/755-147 060/71-00-730		30 years	Stationary apiary	470 m	102	Excellent environmental conditions, 15 km away from the urban zone (no pollution), villages are deserted, no fruit spraying.	Acacia, linden, sometimes also honey	Pollen, propolis, mallow and I purchased the equipment for bee venom
Miroslav Vasiljević	Radojke Zajić 37 - Kruševac	060/44-40-116	miroslav.pcelar.vasiljevic@gmail.com	33 years	The Village of Petina, Kruševac	310 m	10	The region is at the foot of the Jastrebac Mt. with exceptionally diverse flora dominated by all kinds of fruits, acacia, linden and blackberry	Acacia, meadow and honeydew	Propolis and royal jelly, and for myself swarms and queens
Predrag Radulović	Generala Milojka Lešjanina 41a	062/80-64-929		10 years	Zaplanje, the Municipality of Gadzin Han, Radan Mountain - the Kuršumljija Municipality	420 m	25	Extraordinary clean environment without polluters	Acacia, linden and forest honey	Pollen and propolis
Vladan Jakovljević	Dositeja Obradovića 69 - Loznica	064/59-64-362		11 years	The villages of Stupnica and Šurica, Draginac, Loznica	200 m	200	Poorly inhabited area without large fruit orchards and use of chemicals. In a word, pollution-free environment	Acacia and linden honey	Propolis and wax
Mile Simonović	9 Jugovića 1 - Vranje	017/416-185 064/89-07-637		45 years	Stationary apiary on 4 locations around Vranje	350 - 550 m	100	The terrains are rich in acacia trees, vegetation is good and pesticide use minimal	Acacia, meadow and forest honey	pollen powder, propolis and royal jelly - specific-purpose
Živan Radaković	Vase Stajića 50/16 - Sremska Mitrovica	064/28-81-334	zivanradakovic.48@gmail.com	20 years	Acacia - Cer or Kosmaj mountains Linden - Fruška Gora Mountain Srem - Sunflower	107 m	25	I believe that I have met the basic preconditions for normal functioning of the bee colonies in their spring development and their preparation for winter period by selecting wintering locations	Acacia, linden and sunflower	Wax, propolis, pollen and bee queens for own needs
Vladimir Kovačević	Jovana Popovića 28 - Kikinda	063/81-47-165	vladimirkovacevico67q@yahoo.com	15 years	The territory of the Kikinda Municipality and Ljig	80 and 330 m	70	In the vicinity of my bee hives located outside the urban area, there are no polluters, production plants etc., except the very agricultural land that has been treated	Canola (rapeseed), acacia, linden and sunflower honey	Wax, pollen, propolis
Mile Mučalov	Petra Drapšina 32 - Radičević	065/26-70-100	mucalovmile@gmail.com	12 years	Movable apiary, depending on the location Cer Mountain, Banat and Bačka regions, Fruška Gora Mountain, Ljubovija	/	130	Beekeeping in our parts is more and more endangered by herbicides and neonicotinoids that, regrettably, are fatal for apiaries	Meadow, linden, acacia, silkweed, sunflower, honeydew honey	Pollen, propolis, royal jelly, and wax
Dejan Čukalović	Karađorđeva 3 - Indija	069/21-47-501	dejančukalovicpcelar@gmail.com	28 years	the Vlaška and Sokolska mountains, the Fruška Gora Mountain, and Srem and Bačka regions	90 - 1000 m	100	Mountain regions are still good, while the lowland ones are, due to the use of pesticides, getting dangerous for the bees (neonicotinoids disorients bees and lowers their collecting power)	Acacia, linden, sunflower, meadow, and forest honey	Pollen, propolis, royal jelly, wax
Božur Ilić	Selo Kastrat - Kuršumljija	062/32-55-34 027/382-958		25 years	Hilly and mountainous area of the Kuršumljija Municipality	400 m	40	Ecologically clean environment, climate conditions reach the extremes (hot-cold)	Acacia, meadow, and forest honey	Wax, propolis
Kračun Lučijan	Žarka Zrenjanina 38 - Alibunar	069/11-71-957		26 years	Požarevac, The Deliblatski Sands, Vladimirovac	90 m	150	Exceptionally ecologically healthy environment	Acacia, canola (rapeseed), and sunflower honey	Honeycomb, pollen

Sadik Ličina	Mitrovačka 6 - Novi Pazar	063/88-35-272	amellicina@hotmail.com	20 years	The Pešter Highlands and Rudnik Mountain	650 m	200	Bee hives are located at an ecologically clean site, without pollution and use of chemicals	Acacia and linden honey	Wax
Stoiša Ivanović	Radničkog bataljina 40 - Jagodina	064/44-89-257		21 years	Territory of the Jagodina Municipality (Duboka Village)	/	150	A typically agricultural area with a vast non-cultivated land and a significant portion of hilly and wooded terrains. Ecological conditions are favourable.	Acacia and forest-meadow honey	Propels and royal jelly in a smaller scope
Stojan Anđelković	Cara Lazara 27A - Futog	060/58-97-095		31 years	Bačka, Banat and Srem regions, the Cer Mt., and the Sokolske Mountains	82 m	80	Air pollution is small because the bees are located away from the pollution source; when speaking of the soil (sunflower, canola) it is problematic	Canola, acacia, linden, sunflower, floral (meadow) and sometimes honeydew (forest) honey	Wax, propels and pollen
Duško Mijatović	Vuka Karadžića 34 - Gornji Milanovac	064/16-14-252	mijatdr@open.telekom.rs	27 years	Gornji Branetići, Ozrem (the Village of Kriva Reka), to the south of the Rajac Mt. toward the Rudnik Mt. (south-western slopes of the Suvobor Mt.)	450 m	30	healthy conditions, without larger polluters; sometimes some unconscientious farmer sprays his fields (or an orchard) at noon; they are mostly getting more disciplined and adhere to the spraying regulations	Acacia (with fruit), linden (meadow buckwheat), and honeydew (if available)	Propels, pollen, royal jelly (for own needs)
Ivan Jovanović	Trg Svetog Save 2 - Užice	064/23-56-422		15 years	Batočina, Volujav-Užice, Vladimirovac-Alibunar	750 m	100	A relatively clean area away from the motorway and other sources of pollution. Diverse flora and fauna, the area burdened with the numerous bee colonies	Acacia, linden, and sunflower honey	Pollen powder and some propolis
Ilija Avramović	Kralja Milana 4/7 - Žagubica	063/81-81-711	iks@beotel.rs	30 years	Homolje	390 m	52	Very favourable conditions, healthy environment	Acacia, meadow, Homolje honey	Propolis, royal jelly, bee queens
Zoran Dragosavac	Prvomajska 17 - Kostolac	064/82-89-252 012/240-459		36 years	Veliko Gradište, Banat region - Dolovo, Mirmorak	140 m	200	Favourable for beekeeping, numerous watercourses, no pollution	Acacia, linden, floral, sunflower, honeydew honey	Propolis, floral powder, and swarms of bees
Safet Gilić	Kej Mira - Sjenica	063/18-63-830		30 years	Stationary apiary, the village of Razdaginja, Sjenica	1200 m	80	Harsh conditions: long and cold winters, low night temperatures in summer, mostly below 10 degrees C, long dry or long rainy periods. In these conditions the plants have poor nectar flow. Because of that, the honey originates from many diverse plants and is of superb quality	Only meadow honey	Propolis, wax and pollen
Jaroslav Javornik	Maršala Tita 101 - Kulpin	063/89-23-084	javornikjaroslav27@gmail.com	4 years	Mladenovo, the Fruška Gora Mountain, the Pannonian Plain - New Crvenka	85 m	40	healthy and clean environment without industrial polluters	Canola, acacia, linden and sunflower honey	/
Ivan Pihler	Nikole tesle 166 - Susek	064/13-52-899	ivan.pihler@stocarstvo.edu.rs	23 years	The Fruška Gora Mountain	250 - 300 m	80	Stationary apiary, the bees are located on the northern slope of Fruška Gora, where acacia and linden trees dominate, but they also feed upon willow trees and meadows.	Acacia, linden and meadow honey	Pollen and propolis
